% Vaccinated in Northampton Population (Partial/Full)**
4/1/21

17% / 23%

Total Vaccines Given at Northampton Regional Vaccination Site

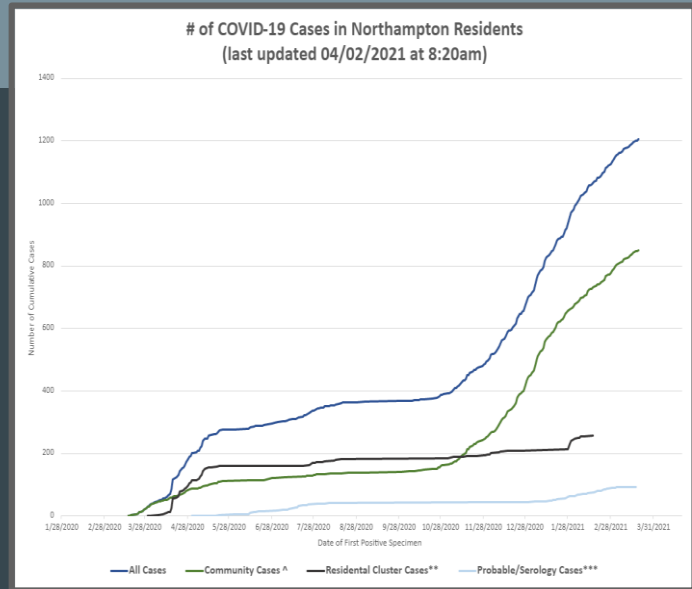

15,502
Includes 1st and 2nd doses

Grey: ≤10 total cases in the past 14 days

Green: <10 avg cases/100,000 AND >10 total cases in the past 14 days

Yellow: ≥10 avg cases/100,000 OR ≥5% test positivity rate in the past 14 days

Red: ≥10 avg cases/100,000 AND ≥5% test positivity rate

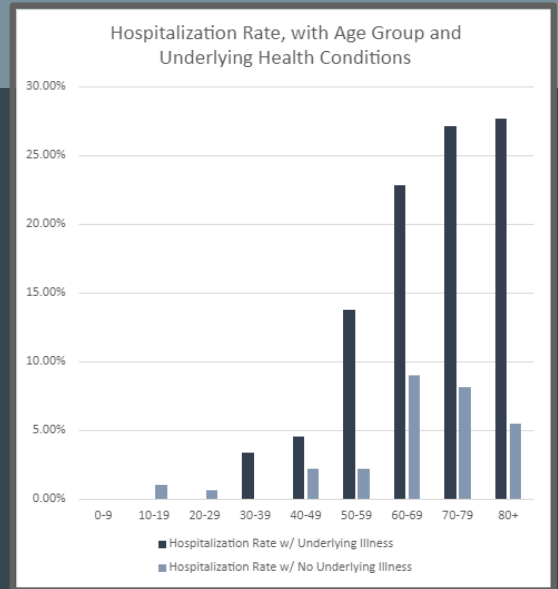

All data are extracted from MAVEN, MDPH, and vital statistics, reporting. Presented data assumes that data sources are current and accurate as of the date they are reported. Case counts include probable cases (antigen and antibody tests) and confirmed cases (molecular tests). Percent positivity is calculated using only positive molecular tests, and does not include antigen or antibody tests.

*Active cases are cases with reported positive PCR and antigen results, who are currently in isolation under public health supervision.

**Partially vaccinated individuals have received 1+ doses of COVID-19 vaccine, but have either not received their final dose or have received their final dose less than 14 days ago. Fully vaccinated individuals have received their final dose of the COVID-19 vaccine at least 14 days ago.

***Hospitalization data includes inpatient and critical care admissions. Emergency room, urgent care, and physician visits are not included in this data. Information regarding hospitalization and underlying illness is collected from patient reports and medical records, which may result in underreporting of data. Rates are calculated out of the total population for which they are reported. For example, ~14% of individuals who were ages 50-59, had underlying illness, and tested positive for COVID-19 became hospitalized.
