

BIG TOYS 5-12 YEAR PLAYGROUND EQUIPMENT

BT-611 Turn Across, Deluxe Compact

BigToys®

The patented BigToys Turn Across is an exceptional play event specifically designed for the 5-12 age range. It offers children the opportunity to practice "games with rules" behavior. The complexities of cooperation, communication and socialization skills cannot be practiced enough and will be practiced quite a bit on the Turn Across. The Turn Across has two main activities; one being the windlass that a single child can easily turn to move the gondola across the rail. The other event is that many children can pile onto the gondola itself, either on the platform, which is an appropriate wheelchair transfer height, or onto the cartage hooping, which can be ridden like a horse. Children run the "game" by controlling the windlass, taking turns to use it or the gondola. The Turn Across is a great prop and stage for pretend and social play, plus a great workout for the one or two children winding the windlass.

Equipment must be installed over resilient surfacing appropriate to the safety guidelines for your area.

BT-776 SkyGame®, 3 Rail

BigToys®

The BigToys patented SkyGame inspires children to engage in "games with rules" play behavior. Skills of communication, cooperation and socialization will be trained on the SkyGame right along with some great upper body strength training. The SkyGame "Pods" do not slide, but must be lifted and moved across the rails. Children who meet at the center can negotiate to trade pods and cross from one side to the other.

BT-2301 Explorer

BigToys®

Coastal color choice shown. Other color options available.

The Explorer incorporates some of our newest events including the BigTube-with Lookout Bubble, PlayPod Traverse and PlayShell Climber. The "circuit play" design means that children are able to play on almost everything without ever touching the ground.

Rock 'n Cross™ by BigToys

BigToys' Rock 'n Cross™ redefines the large seesaws of our youth by combining a multi-rider teeter-totter with a dynamic overhead activity! The unique design of the Rock 'n Cross™ removes the dangers of traditional teeter-totter by eliminating pinch points and sudden stops through the use of an internal spring-assisted action. We haven't limited the fun though, as riders experience the same movements and sensations we all loved as kids.

The Rock 'n Cross™ is the newest example of BigToys' dedication to providing children with physical and social development in a fun and exciting play activity.

Visit the BigToys website at www.bigtoys.com for a video of this awesome new activity. Or call your local BigToys representative for more information.

ME08 EpiCenter™

BigToys®

The EpiCenter™, an instant playground focal point, promotes collaborative play by linking movement from kids at the periphery with kids in the center bowl. Rocking side-to-side moves adjacent pods in and out, and vice versa. The complex interlinked motion of the EpiCenter promotes cooperation, develops balance, core strength, and is loads of fun!
