## Memorandum

---

To: Donna LaScaleia, DPW Director *Approved 8-21-2023*  
From: Greg Newman, Senior Engineer  
Date: August 9, 2023  
Re: National Grid petition to install one (1) JO utility pole with anchor on Bradford Street

---

National Grid is proposing to install one (1) joint operation utility pole with anchor on Bradford Street approximately 480 feet southwest of Industrial Drive/Bates Street. New pole #3-50 will replace a tree guy being removed from pole #3-1. **Please note the proposed pole location was marked on site at the time of engineering field review on August 9, 2023.**

A review of City records indicates the following:

1. SEWER. There is an 8-inch AC sewer main in Bradford Street approximately 7 feet north of the proposed pole location. There is a 6-inch sewer lateral servicing the even-numbered (east) side of the street approximately 40 feet north of the proposed pole location (30 feet south of pole #3). The service branches from the main approximately 91.8 feet southwest of the sewer manhole closest to pole #3, and 132.4 feet northeast of the sewer manhole closest to pole #4 (paved over). **The contractor shall locate the proposed pole more than 3 feet from the street line to avoid conflict with the main. The contractor shall locate the proposed pole more than 5 feet from the sewer service.**
2. WATER. There is an 8-inch DI water main in Bradford Street more than 5 feet from the southeast edge of pavement. There are no water services in the vicinity of the proposed work. **No conflicts with water in Bradford Street are anticipated.**
3. DRAIN. There are no storm sewers located in this section of Bradford Street. **No conflicts with storm drains in Bradford Street are anticipated.**

*A Northampton DPW Trench Permit is required prior to construction.*

White markings indicate the proposed location of utility pole #3-50 on Bradford Street, looking northeast towards Industrial Drive. Utility pole #3 is located on the right.
