September 5, 2023

City Council Members,

I respectfully request that up to \$20,000 from the Gift Fund be allocated for painting spaces at the Senior Center and adding chair rail molding in the Games/Billiards Room.

As part of the Capital Improvement Plan for Fiscal Year 2024, window repairs are currently underway. Painting has also been identified as a need but it is not included in the Capital Plan this year. I am requesting use of money from the Gift Fund so that painting can be completed in tandem with the window repairs as this will decrease the cost of the painting project. First, the cost of the current window repair project includes color matching and repainting any walls where windows were repaired. Given that painting at least one wall in multiple rooms is part of the current project, the additional cost for painting does not include those walls. If we wait another year or two to paint and update colors, the quote would involve all walls and would result in repainting walls that were painted as part of the current project. Furthermore, we anticipate cost savings as crews are already mobilized with equipment on site.

We plan to obtain recommendations from an interior designer as we create a vision for the entire building. Up to \$20,000 from the Gift Fund will not cover all of the needed painting throughout the building, however it will give us an opportunity to address the need in many areas now while work is already underway.

Thank you for your consideration and support,

Respectfully Submitted,

Kimberly Park
